

# GATES

Gryffin customize Gates to fit risk assessment, functional requirement, existing structures and budget from single, double, automated, track, cantilever or anti-ram specification. Gryffin also provides design and construction for general engineering, fabricating and welding services.

**GRYFFIN**  
HIGH SECURITY FENCING & GATES  
Smarter solutions, guaranteed.

# GATES

## DESCRIPTION

Gryffin customize gates to fit risk assessment, functional requirement, existing structures and budget from single, double, automated, track, cantilever or anti-ram specification. Gryffin also provides design and construction for general engineering, fabricating and welding services..

Gate variations include pedestrian or vehicle with swing, track, cantilever or anti ram specification.

## APPLICATIONS

- Gryffin Gates have been designed and manufactured to all shapes, colours and sizes, both automatic and manual.
- Materials employed can include TangoRail®, Maxiguard® Palisade, Fortis® 358 or Securifor 2D, Securifor® 358. So the gate system is not a weak link in total security system.

## CUSTOMER BENEFITS

- No matter the application, there's a gate to fit.
- Gryfhinge solves the problem of sagging gates and the disabling of closure mechanism including electronic setups.
- Gryffin's smart solution Gryfhinge enables full adjustment with vertical and horizontal planes of gates up to 6m. (1 Tonne per hinge)
- Customers can now adjust gates themselves when needed with a simple spanner.
- Retrofit gates up to 6m gateleaf.
